Rational Unified Process

Telesens has partnered with hundreds of software vendors to help them lowering deployment costs for their customers and allowing them to be focused mainly on product development.

For our customers, we provide a wide range of professional services designed to meet specific needs of software vendors:

To develop a seamless strategy, we closely work together with customers, trying to understand their vision on an appropriate solution. Then we use our technological expertise, knowledge in vertical business domains, reusable components and frameworks, passion for innovation and challenging tasks to be able to go through the whole project:

Solution Planning

- Detailed analysis of requirements and discussing solution variants
- Solution prototype development and evaluation
- Planning of solution implementation, including necessary customizations of 3rd-party products and developing of integration components
- Migration planning

Integration and   Implementation

- Technical integration and implementation
- End-to-end solution testing, including software, hardware, 3rd-party components and external interfaces
- Legacy data migration
- staff trainings

Support   and Maintenance

- On-going technical support
- Upgrades and patches
